# Proposal for Guest & Visitors Center

---

**Objective:** Establish a single center for processing BNL's scientific guests, users, and short-term visitors (non-employees) to provide efficient and uniform orientation for all departments, divisions, and user facilities at the Laboratory. The Center would provide a unified management structure for guests, users, and visitors, act as an advocate with the Brookhaven management to ensure that non employees comply with Laboratory and DOE policies, standards, procedures, regulations, and training.
